1. To conjunct two characters press + (the key with = and + sign, don't use shift)
2. No need to install the software, you can unzip using 7zip in a folder and create a shortcut to the desktop. Minimizing the software will put it to the taskbar and you can use Control+Q to switch between Assamese and English and vice versa. However you need DOTNET framework 2.0 or 4.0 to run the software which is freely downloadable from Microsoft's website.
